

Frankenstein

Writing Prompts

Directions: Pick three of the following questions. Write an extended paragraph to answer each of them that contains a thesis statement, your ideas relating the text to the question, and text evidence. This is your summative grade for *Frankenstein*.

1. How has the creature changed during the selected text excerpt we have just read? What has contributed to these changes?
2. Is the creature ultimately responsible for how he has changed or should the cottagers assume some of the blame? If so, why? If not, why not?
3. Based on the pages just studied, does Victor Frankenstein hold any responsibility for the creature's current situation and state of mind? If so, why? If not, why not?
4. What qualities or characteristics would you now use to define a "monster"? At this point in the novel, would you characterize the creature as a monster or not? Use evidence from the text to support your response.
5. After examining this text excerpt, how does the fact that these sections are told from the creature's point of view impact how you "see" him and relate to him as a character?
